# BULLYING

(Parent & Child Class)

MEANWHILE...

Space is Limited

In recent years, there has been a large jump  
in numbers of children being bullied, or  
bullying, due to advancements in  
technology and, overall,  
change in societal ways. In  
this course, parents learn  
how to deal with their  
child getting bullied, or  
being the bully, while  
children learn how they  
can react to being bullied  
and how their bullying affects  
others. This course has been put  
together by a group of students in the  
parenting class at Pewaukee High  
School using recent research to back  
their information.
